

## Mezzanine Floors

A mezzanine floor is the most effective way to increase, or even double, available floor space. The mezzanine floor may be used to support office accommodation, additional manufacturing space or additional storage capacity.

Please note that Mezzanine Floors are not 'off the shelf' items and are designed around your requirements. Warehouse Storage Solutions will also take care of all Building and Local Authority requirements. If you are currently looking at having a Mezzanine Floor installed and would like a quote, please [click here](#) to send us a quotation request or call us on 01423 819057. [Click here](#) for more information.
